[DURABOOK R11L-DM_20250923.pdf](#)[comparison table: tablets](#)[product page](#)**Data notes:**

1. **Resolved:** The product page stated „IP65 and MIL-STD-810G“ in two places, while the comparison table: tablets listed „MIL-STD-810H“ and „MIL-STD-461G“. The manufacturer datasheet confirms IP66, MIL-STD-810H and MIL-STD-461F – neither previous value was fully correct.
2. **Corrected:** The comparison table listed MIL-STD-461G; the manufacturer datasheet states MIL-STD-461F (see item 1).
3. **Corrected:** The previous value stated a base clock of 1.2 GHz for the Intel® Pentium® Gold 8505. The manufacturer datasheet states only the turbo clock (up to 4.4 GHz) plus cache and core configuration for this CPU, no base clock; the 1.2 GHz figure is therefore not carried over.
4. **Resolved:** A serial port/RS232 was not shown as present in the detail table of the comparison table: tablets, while the product page mentioned an optional expansion module „RJ45 / RS232 and smart card combo reader“. The manufacturer datasheet confirms RS232 as an option in the expansion slot – the product page was right.
